Education

Bachelor of Business Administration (Business Intelligence and Data Analytics) Amity University, Noida CGPA: 8.74	2024 – 2027
Goethe-Institut – German Language (B1)	2025 – 2026

Skills

Programming:	Python, SQL
Business Intelligence:	Power BI, MySQL, Excel
Python Libraries:	Pandas, NumPy, Matplotlib, Playwright, Streamlit, React
Business Analysis:	Requirement Gathering, Data Validation, Process Analysis, Documentation
Cloud	Azure Fundamentals, Databricks Fundamentals
Others	Prompt Engineering

Experience

Business Analyst Intern (On-Site) Mankind Pharma Ltd.	May 2026 – Present
--	---------------------------

- **Super AI — Enterprise AI Response Validation Automation**
Developed an enterprise AI query validation framework that fully automates the validation of medicine-related query generated by an internal SuperAI model against approved PDF-based business documents using Python, Playwright, PyMuPDF, PyPDF, OpenAI API, and Pillow, achieving approximately 95% validation accuracy while significantly reducing manual review effort.
- **Quality Management System (QMS) — Document Intelligence Pipeline**
Developing an end-to-end regulatory document intelligence pipeline for QMS/SOP workflows, covering automated document collection, PDF processing, and structured profiling across regulatory sources. Building a standardized document intelligence framework to organize regulatory information and support automated document comparison, change identification, and compliance traceability.

Projects

Business Analytics Assistant

- Developed an AI-powered business analytics application for KPI reporting and interactive dashboards. Designed an end-to-end analytics pipeline incorporating data ingestion, preprocessing, EDA, KPI computation, and interactive visualizations, enabling faster and more informed decision-making. Implemented conversational analytics using Large Language Models (LLMs), enabling users to explore datasets, generate reports, and interpret business metrics through natural language interactions.

Retail Sales Analytics Dashboard

- Built an interactive Power BI dashboard to analyze sales, profit, customer segments, and regional performance using retail sales data. Applied data transformation and exploratory analysis techniques to ensure high-quality reporting and uncover business performance trends. Created interactive KPI dashboards and analytical reports to support business monitoring, performance evaluation, and strategic decision-making.

Achievements

3rd Place – INBUSH 2026 Hackathon	Amity University
• Secured 3rd Place among 63 participating teams at the INBUSH 2026 Hackathon. • Presented AuthenKAtE, a Figma prototype for an AI-powered feedback authentication solution to address fake online reviews through verified customer feedback.	

Certifications

- Cisco Data Science Essentials with Python • Google Data Analytics Professional Certificate • Oracle OCI AI Foundations Associate
